English (B2)

## MY RECENT WORK

**Android ChatGPT Client**
Android mobile app made with Java. You can easily dialogue with ChatGPT using your phone.
https://github.com/Marcinzale/AndroidJavaChatGPTClient

**Java Android BMI Calculator**
Android mobile application that calculates BMI. It uses a number picker to select the user's height and weight. It also tells you if your weight is right or if you are overweight or underweight.
https://github.com/Marcinzale/BMICalculator

**Barcode Origin Checker**
Android mobile app made with Kotlin. It scans the barcode and displays the flag and information about the country of origin of the product.
https://github.com/Marcinzale/BarcodeScanner

**Flip The Coin**
If you can't make a decision and want to flip a coin but unfortunately you don't have it in your pocket - just use this app. This funny Android mobile app made with Kotlin uses coin animations an statistics. Have fun!
https://github.com/Marcinzale/FlipTheCoin

**My Personal Portfolio Website**
Portfolio website built with React.js, Next.js and Tailwind CSS.
https://github.com/Marcinzale/react-tailwindcss-portfolio
